About Me

Full-Stack Developer with 4+ years of experience delivering high-quality web applications, from pixel-perfect UIs to scalable, secure backend architectures. Proficient in modern front-end frameworks (React, Next.js, Vue.js) and back-end ecosystems (Node.js, Express, Laravel), with strong expertise in REST APIs, real-time systems, and DevOps pipelines. Passionate about clean code, performance optimization, accessibility, and building products that scale.

Skills

Languages: JavaScript (ES6+/Node.js), TypeScript, PHP, Java, HTML5, CSS3, SCSS

Frontend: React.js, Next.js, Vue.js, React Native, Redux Toolkit, Tailwind CSS, GSAP, Framer Motion, Bootstrap, Material UI, Ant Design Etc

Backend: Express.js, Laravel, NestJS, Socket.io

Databases: MySQL, PostgreSQL, MongoDB, Redis

ORMs: Sequelize, Drizzle, Mongoose ODM, Prisma

DevOps: Docker, Nginx, Jenkins, PM2, AWS (EC2, S3)

Security: JWT, OAuth2, bcrypt, Argon2, Helmet.js

Testing: Jest, Mocha, Cypress, React Testing Library, Postman, Swagger

Tools: Git, Vite, Webpack, VS Code, Firefox DevTools

JavaScript / TypeScript:

React / Next.js / Vue:

Node.js / PHP:

API Development:

Responsive Design:

Databases & Optimization:

Security / Auth:

DevOps & CI/CD:

Experience

Frontend Developer

Nyasa Production Studio, Remote

April 2021 – January 2023

- Designed engaging dashboards using Vue.js and Tailwind CSS with the backend powered by PHP/Laravel.
- Developed RESTful APIs, integrated Firebase real-time features, and handled authentication/role-based access.
- migrated legacy jQuery user interfaces into modular Vue components, improving load time by 40%.
- Managed MySQL database modeling, indexing, migrations, and cron jobs.

Full-Stack Developer

Maxlence, Gurugram (Gurgaon)

February 2023 – March 2025

- Developed scalable applications using React, Express, and MySQL with modular architecture.
- Designed and optimized REST APIs with caching layers (Redis) and custom middleware.
- Improved front-end performance via lazy loading, code splitting, and Lighthouse optimizations.
- Managed Docker deployments, Nginx reverse proxy, and Jenkins CI/CD pipelines.
- Implemented logging, error tracking, and monitoring using Winston and PM2.

Full-Stack Developer

Sthaniya Saathi, Remote

March 2025 – Present

- Spearheaded ERP front-end with React, Tailwind, Chart.js, and complex form flows.
- Architected back-end using Node.js, MySQL, dynamic schema logic, and role-based access.
- Integrated WhatsApp APIs, Google Maps, and accessibility/performance enhancements.
- Deployed services on AWS EC2 with CI/CD and automated backups.

Projects

MERN Stack Portfolio

Live

- Fully responsive personal developer portfolio showing projects, skills, and a contact form.
- Built with React, Express, MongoDB, React Router, and Tailwind CSS.

CodePen 2.0

Live

- Built a CodePen clone where users can create and share HTML, CSS, and JavaScript snippets in real-time.
- Integrated a live preview feature, allowing users to see their code changes instantly.
- Implemented local storage persistence to prevent code loss when refreshing or closing the browser.
- Focused on performance optimization, reducing loading times by lazy loading resources and compressing code.

Furni.Shop – Furniture E-Commerce Website

Live

- Designed and developed a responsive furniture e-commerce front-end using React and TailwindCSS.
- Displayed static product data with modern UI layouts and category-based organization.
- Implemented a shopping cart interface with local storage persistence for cart items.
- Ensured mobile-first design and optimized images for better performance.

Beyoung E-Commerce App

Live

- Developed a full-stack e-commerce application with React, Express, TailwindCSS, Material UI, and Redux for state management.
- Implemented product catalog, cart management using LocalStorage, and responsive UI with Tailwind and MUI components.
- Built secure backend APIs in Express for product retrieval, user authentication, and order processing.

API Gateway with Express

- Lightweight built gateway with route proxying, caching, and per-IP throttling.

Education

- **Bachelor of Computer Applications (IT)**
- Gauhati University, 2019 – 2023
- Grade: 78%

Certifications

- Full-Stack Web Development
- Newton School, Nov 2022

Co-Curricular Activities

- Open-source contributions (UI libraries, backend utilities)
- Design system exploration on Dribbble and Figma
- Scalable system design research (Kafka, RabbitMQ)
